

Infinite Area

Country: Italy
 Sector: Digital Signage
 Installed labels: G1 pro in all available sizes
 Start of installation: 2015

OVERVIEW

The project Infinite Area is located in Montebelluna in Italy and is designed as an open space area where people can rent co-working space, meeting facilities, event locations and innovation space. The lightweight, wireless solution of the PDi Digital pro line supports the great visual impact of the design project.

SOLUTION

Whenever an external party rents a meeting room or any other facility, the key information of the reservation is automatically displayed on the label. The reservation software allows to also display information like the logo of the company and the type of the meeting. The new solution replaces the manual reservation through the secretarial office and the regular change of the meeting room labelling by the secretary on duty. Booking rooms, facilities but also all kind of equipment is realized with PDi Digital e-paper labels in all available sizes.
