

# Digital Inventory Management

Tired of stock-outs and excess stock? Need a high-powered, intelligent system for inventory management? Thanks to **sep100 technology** by PDi Digital, it's never been easier to keep your stock under control. With sep100 displays, you can instantly visualize product information on-site, in your warehouse. Real-time order statuses and delivery dates are shown in real time, reducing bottlenecks, and increasing efficiency.

Better yet, you can connect sensors and scales to our smart IIoT platform, enabling fully automated reordering processes. When stock falls below a defined threshold value, a replenishment order is automatically triggered, and then automatically updated on the digital display after refill. When it comes to your warehouse, why not let out technology do the heavy lifting?

## Key Benefits

- Automated reordering when stock falls below a defined weight threshold.
- Smart reordering and refill confirmation using integrated buttons.
- Instant stock updates after removal or refill.
- Compatible with pick-by-light and put-to-light systems.
- Data collection for analytics and forecasting (pattern recognition).
- Realization of digital Kanban shelf signages.
- Automated updates and integration to ERP systems.

## sepioo Technology

At PDi Digital, we disrupt the future of industrial IoT. Our **sepioo IIoT technology** helps to realize a digitally connected world where **relevant data** is shared at the **right time** to the **right people**: all this in a power efficient and sustainable way. sepioo is delivered via a powerful IIoT platform, reliable infrastructure, and digital displays complete with ultra low energy IIoT sensors. Together, these help our customers and partners to maximize their digital potential. Secure two-way communication is ensured via wireless 2.4 GHz frequency, via a SIM Card (NB-IoT) to your mobile carrier or, for our newest battery-free sepioo display, via NFC.

### About PDi Digital

Based near Graz, Austria, PDi Digital is an IIoT tech company powered by a close-knit team of industry experts. We combine the knowledge of our shareholders, SES-imagotag and Bossard AG, with our unique flexibility and flair to bring startup agility to established global market leaders.
